

CSE 406: Computer Security

Online on SQL Injection — B2

20 mins | 10 Marks

CSE, BUET

July 14, 2025

Assignment Overview

You will have to exploit SQL injection vulnerabilities in an e-commerce website with forms susceptible to SQL injection.

Website URL: <http://20.195.40.95/>

Problems

There are **three** challenges. Explore the website to find the challenges.

Note: You may try to inspect the HTML code in the browser to bypass input validation.

Submission

Copy the payloads you designed for each challenge in a text file, and rename the text file as your student ID. Submit the text file to the Moodle submission link.

Example submission format:

```
Payload 1: <your input>
Payload 2: <your input>
Payload 3: <your input>
```

Constraints:

1. Don't use any tools, i.e., sqlmap
