CSE 406: Computer Security

Online on SQL Injection — A2

20 mins | 10 Marks

CSE, BUET

July 12, 2025

Assignment Overview

You will have to exploit SQL injection vulnerabilities in a Wordle game website with a form susceptible to SQL injection.

Website URL: http://52.77.223.187/

Problems

There are **four** challenges. Explore the website to find the challenges.

Note: For security measures if your queries contain `"--"`, the server will remove it.

Submission

Copy the payloads you designed for each challenge in a text file, and rename the text file as your student ID. Submit the text file to the Moodle submission link.

Example submission format:

```
Payload 1: <your input>
Payload 2: <your input>
Payload 3: <your input>
Payload 4: <your input>
```

Constraints:

1. Don't use any tools, i.e., sqlmap
